COMING UP... Patients' Experiences with Urinary Tract Infections

The CAIRIBU Interactions Core is working with women from the [UTI Health Alliance](#) to develop interactions between patients and providers. **Stay tuned for a virtual patient panel in June** in which women with histories of recurrent UTIs will share their experiences and pose questions to urology and urogynecology providers and researchers. **ALL ARE INVITED.** The June patient panel will be followed later by a panel of clinicians and scientists who will share their perspectives on treating and researching UTIs. The overarching objectives of this initiative are to provide a platform for cross-talk and knowledge exchange, foster patient-provider and patient-researcher collaborations, and promote greater awareness of UTIs as the most diagnosed outpatient infection in the US.
