We are currently accepting applications for the Multidisciplinary K12 Urologic Research Career Development (KURe) Program. This K12 Institutional Career Development Grant provides career development training and support to qualified clinical, translational and basic science researchers (MDs, DOs, PhDs and MD/PhDs) from diverse disciplines and departments who are interested in building an independent research career using collaborative, multidisciplinary approaches to benign urological research questions.

- Applications due: September 9, 2024
- Expected appointment date: October 1, 2024

The program includes:
- Didactic and interactive training in research skills and career advancement
- Tailored mentorship from expert leaders in the field
- Monthly meetings with scholars and program leaders
- Salary support up to $100,000/yr for 75% of full professional effort (50% - 75% if surgical specialty)
- Research and career development support up to $40,000/yr for research supplies, equipment and technical personnel; tuition and fees for career development; travel to research meetings
- Opportunities to network, present and establish long-standing research collaborations
